

Bludcor Capsuls

Bludcor Capsuls

Each 500 mg. contains

Composition

Vasa (Adhatoda vasica).....	125 mg
Tulsi (Ocimum santum).....	50 mg
Haridra (Curcuma Longal).....	25 mg
Bow rasa (Archetto (musica).....	25 mg
Halite (Natrium).....	75 mg
Sodium bicarbonate (Natron.....	100 mg
Magnesium stearate (Dryer).....	q.s.

Indications

Useful in all kinds of Blood diseases.

Description

BLUDCOR CAPSULE is a combination of herbs like Vasa (Adhatoda vasica), Tulsi (Ocimum santum), Bow rasa (Archetto musica), Ginger (Zingiber officinale), Haridra (Curcuma Longal). The leaves of the vasa plant contain the alkaloid vasicine (C₁₁H₁₂N₂O), which is responsible for the small but persistent bronchodilatation, and an essential oil which is chiefly responsible for the expectorant action. The leaves and roots contain other alkaloids, vasicinone, vasicinolone and vasicol, which may contribute to the bronchodilatory effect through anticholinergic action on the vagal innervation of the bronchii. The bronchodilation effect is considerably increased after atropine administration. Studies have also shown vasa to be effective in the treatment of amlapitta (dyspepsia) and pyorrhea. The in vitro growth of several strains of Mycoplasma tuberculosis was inhibited by the essential oil at concentrations in the range of 2-20 ug/ml. There has also been a report of thrombopoetic (platelet-increasing) activity with vasicine.

Sodium is a compound of many foodstuffs, for instance of common salt. It is necessary for humans to maintain the balance of the physical fluids system. Sodium is also required for nerve and muscle functioning. Too much sodium can damage our kidneys and increases the chances of high blood pressure.

The amount of sodium a person consumes each day varies from individual to individual and from culture to culture; some people get as little as 2 g/day, some as much as 20 grams. Sodium is essential, but controversially surrounds the amount required.

Bludcor Capsuls
Vasa (Adhatoda vasica) + Tulsi (Ocimum sanctum) + Haridra (Curcuma Longa)

Bludcor Capsuls

Bludcor Capsuls

The active constituent is known as curcumin. It has been shown to have a wide range of therapeutic effects. First, it protects against free radical damage because it is a strong antioxidant. Second, it reduces inflammation. It accomplishes this by reducing histamine levels and possibly by increasing production of natural cortisone by the adrenal glands. Third, it protects the liver from a number of toxic compounds. Fourth, it has been shown to reduce platelets from clumping together, which in turn, improves circulation and helps protect against atherosclerosis. Numerous studies have also shown cancer-preventing effects of curcumin. This may be due to its powerful antioxidant activity in the body.

Dosage

2 CAPSULE at a time, 3 times a day or as directed by Physician

Presentations

90 Caps.

Note : This product information is intended only for residents of the India. Taj Pharmaceuticals Limited, medicines help to treat and prevent a range of conditions—from the most common to the most challenging—for people around the world.
