

Tocoder ®

Tocoder ®

Each soft-gel capsule contains

Composition

Vitamin E B.P.....400 mg

Indication

Vitamin E, widely recognized for its antioxidant activities, appears to be protective against cardiovascular disease and some forms of cancer in some individuals. It has demonstrated immune-enhancing effects. It may be of limited benefit in some with asthma and rheumatoid arthritis. It may be effective in protecting against air pollution and some other toxins and may be helpful in some neurological diseases (including Alzheimer's disease) and in some eye disorders (particularly cataracts) and to some individuals with diabetes and premenstrual syndrome. It may also help protect skin from ultraviolet irradiation. Claims that it reverses skin aging, enhances male fertility and exercise performance are poorly supported. There is no credible evidence that it increases sexual prowess. It may help relieve some muscle cramps.

Description

Vitamin E is a powerful antioxidant that works to protect cells in the body from damage caused by free radicals. Free radicals are highly reactive substances that result from normal metabolism as well as from exposure to factors in the environment like cigarette smoke and ultraviolet light. They cause damage to body cells by attacking the cell's membranes, proteins and DNA and ultimately contribute to the development of health problems such as heart disease and cancer. Vitamin E is especially important in protecting blood cells, the nervous system, skeletal muscle and the retinas in the eyes from free radical.

Dosage

As per the physician's advice.
